Summary of Services

Provided project management, logistics, and technical expertise to perform the employee movement of **60 complex trader systems** on active trading floor.

Project Management Services: Created a move plan based on pre-move seating arrangements and post-move requirements. Developed inventory of systems, including number of CPU, Monitors, Switches and other ancillary devices necessary for user interface. Established user-specific equipment and labeled according to destination seat assignment. Creating mapping of seat requirements and implemented strategy to minimize redundancy in effort.

Technical Services: Using diagrams and mapping to protect system integrity, our technicians managed the successful rearranging of trade floor in **5 total hours**. Services also included the vacuuming and blow out of system dust.
